### 1.4 Emergency telephone number

### National advisory body/Poison Centre

Telephone number

: International: +1 (352) 323-3500 (INFOTRAC® INTL) National Emergency Poison Centre (24hrs) : 111

# **SECTION 2: Hazards identification**

# 2.1 Classification of the substance or mixture

Product definition : Mixture

# Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Eye Dam. 1, H318

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - United Kingdom: Northern Ireland

Clear Silicone

# SECTION 3: Composition/information on ingredients See Section 16 for the full text of the H statements declared above.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

# **SECTION 4: First aid measures**

# 4.1 Description of first aid measures

| Eye contact                | • | Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.   |
|----------------------------|---|--|
| Inhalation                 | - | Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact               | : | Get medical attention immediately. Call a poison center or physician. Flush<br>contaminated skin with plenty of water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated<br>promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly<br>before reuse.  |
| Ingestion                  | : | Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

# 4.2 Most important symptoms and effects, both acute and delayed

# Over-exposure signs/symptoms

| Eye contact | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness |
|-------------|--|
| Inhalation  | : No specific data.  |

# **SECTION 4: First aid measures**

| Skin contact             | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur |
|--------------------------|--|
| Ingestion                | : Adverse symptoms may include the following: stomach pains  |
| 4.3 Indication of any in | nmediate medical attention and special treatment needed  |

| no maioraion or any minioration and opportant outfinit house |   |  |
|--|---|--|
| Notes to physician   | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |  |
| Specific treatments  | No specific treatment.  |  |
|  |   |  |

# **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | :   | Use an extinguishing agent suitable for the surrounding fire.   |
|--|-----|---|
| Unsuitable extinguishing media                             | :   | None known.   |
| 5.2 Special hazards arising fi                             | ron | ۱ the substance or mixture  |
| Hazards from the substance or mixture                      | 1   | No specific fire or explosion hazard.   |
| Hazardous combustion products                              | :   | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                                |     |   |
| Special protective actions for fire-fighters               | :   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective<br>equipment for fire-fighters          | :   | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | ote | ective equipment and emergency procedures   |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Provide adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment. |
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions  | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |

### 6.3 Methods and material for containment and cleaning up

# SECTION 6: Accidental release measures

| Small spill                     | : Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.  |
|---------------------------------|--|
| Large spill                     | : Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

# SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### **PNECs**

No PNECs available

## 8.2 Exposure controls

#### **Appropriate engineering** controls

: If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

#### Individual protection measures

Date of issue/Date of revision

: 4/3/2024

# **SECTION 8: Exposure controls/personal protection**

| Hygiene measures                | Wash hands, forearms and face thoroughly after handling chemical produ-<br>before eating, smoking and using the lavatory and at the end of the workin<br>Appropriate techniques should be used to remove potentially contaminated<br>Wash contaminated clothing before reusing. Ensure that eyewash station<br>safety showers are close to the workstation location.  | ng period.<br>d clothing.                            |
|---------------------------------|---|--|
| Eye/face protection             | Safety eyewear complying with an approved standard should be used whe<br>assessment indicates this is necessary to avoid exposure to liquid splashe<br>gases or dusts. If contact is possible, the following protection should be w<br>unless the assessment indicates a higher degree of protection: chemical s<br>goggles and/or face shield. If inhalation hazards exist, a full-face respirator<br>required instead.  | es, mists,<br>⁄orn,<br>splash                        |
| Skin protection                 |   |  |
| Hand protection                 | Chemical-resistant, impervious gloves complying with an approved standa<br>be worn at all times when handling chemical products if a risk assessment<br>his is necessary. Considering the parameters specified by the glove man<br>check during use that the gloves are still retaining their protective properties<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consist<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. | t indicates<br>ufacturer,<br>es. It<br>be<br>ting of |
| Body protection                 | Personal protective equipment for the body should be selected based on to<br>being performed and the risks involved and should be approved by a spec<br>before handling this product.   |  |
| Other skin protection           | Appropriate footwear and any additional skin protection measures should l<br>selected based on the task being performed and the risks involved and sh<br>approved by a specialist before handling this product.   |  |
| Respiratory protection          | Based on the hazard and potential for exposure, select a respirator that mappropriate standard or certification. Respirators must be used according respiratory protection program to ensure proper fitting, training, and other i aspects of use.  | to a   |
| Environmental exposure controls | Emissions from ventilation or work process equipment should be checked<br>ensure they comply with the requirements of environmental protection legi<br>n some cases, fume scrubbers, filters or engineering modifications to the<br>equipment will be necessary to reduce emissions to acceptable levels.   | slation.   |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                          |                                  |

# 12.2 Persistence and degradability

**Conclusion/Summary** : Not available.

# **12.3 Bioaccumulative potential**

Not available.

| 12.4 Mobility in soil                  |                  |
|--|------------------|
| Soil/water partition coefficient (Koc) | : Not available. |
| Mobility                               | : Not available. |

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

### 12.6 Endocrine disrupting properties

Not available.

### 12.7 Other adverse effects

No known significant effects or critical hazards.

# SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 13.1 Waste treatment methods

**Product** 

# **SECTION 13: Disposal considerations**

| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
|---------------------|---|
| Hazardous waste     | : The classification of the product may meet the criteria for a hazardous waste.  |
| Packaging           |   |
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions | This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.   |

# **SECTION 14: Transport information**

|                                    | ADR/RID        | ADN            | IMDG           | ΙΑΤΑ           |
